booklist editorial policy
Booklist is a program of the American Library Association's Publishing Committee. The purpose of Booklist is to provide a current guide to materials worthy of consideration for purchase by small and medium-sized public libraries, school media centers, and community college libraries. Materials considered for review, with the exception of books in the non-English-language bibliographies, are limited to works published in English and distributed in the U.S. Textbooks may be evaluated and selected when relevant for library use. Materials which are highly technical, sectarian, or parochial in character, free materials, periodicals, and pamphlets are outside the scope of the regular reviewing program. Standard selection criteria consonant with the Library Bill of Rights and its various interpretations as adopted by the Council of the American Library Association are followed by the Booklist staff.

A review in Booklist constitutes a recommendation for library purchase. ★ beside a title is a mark of quality, not necessarily of wide appeal or usefulness, and indicates an item selected by the staff as particularly good in its genre. **YA** at the end of an imprint denotes a book also recommended in the Books for Young Adults section.

The Booklist editorial and reviewing staff has the responsibility for selection and review of books and nonprint materials in the regular sections. Editors also assign materials to carefully selected field librarians and media and subject specialists. Selection and annotation of items in special lists are the responsibility of the reviewer.

As a general policy Booklist does not consider for review books received more than one month after publication date: the limit for nonprint materials is three months following release date. Booklist uses the Dewey Decimal Classification and Library of Congress subject headings from Cataloging in Publication [CIP] or from the cataloging data of the Ohio College Library Center [OCLC]. When these are not available, classification and subject headings assigned by the Booklist cataloger are indicated by †.

reference and subscription books reviews
These reviews are prepared by members of the ALA Reference and Subscription Books Review Committee and represent the combined opinion of the Committee. RSBR is a separate publication within Booklist and operates totally under its own policies and procedures. Books not recommended for purchase as well as those recommended are reviewed.

advertising policy
Booklist adheres to all commonly accepted advertising practices and makes every effort to treat its advertisers fairly. Booklist reserves the right to reject any advertisement. Acceptance of an advertisement does not imply endorsement of the product or service advertised.

production
The staff of the ALA Central Production Unit coordinates the production of Booklist with composition on the computer-driven photocomposition system of Auto-Graphics, Inc., Monterey Park, California, prepress film preparation by J. & J. Graphics, Chicago, Illinois, and printing, binding, and distribution by W. A. Krueger Co., Brookfield, Wisconsin. Design consultation by Apostrophe, Chicago, Illinois.

subscriptions
Booklist is published twice monthly, September through July, and once in August by the American Library Association, 50 East Huron Street, Chicago, Illinois 60611. Subscriptions: USA, Canada, and PUAS countries, $24 per year; other countries $25. Single copy $1.25. Address new subscriptions, renewals, and related correspondence to Robert Nelson, Manager, Membership, Subscription and Order Services. Second-class postage paid at Chicago, Illinois and at additional mailing offices.

Scope of the Encyclopedic Dictionary of Religion—The aim of the EDR is to provide its reader with a summary of available information on topics of religious interest, its entries being arranged in alphabetical sequence. It will be primarily concerned with the Roman Catholic religion, but will offer information about the Eastern Churches, Protestantism, the Jewish religion, and about non-Christian religions, especially as these are related to Catholic belief and practice. The basic beliefs and practices of these religious bodies, their theological development, the significant and interesting controversies centered about them are all dealt with. Included also are matters from other fields—philosophy, psychology, sociology, law, politics, history, archeology, anthropology—insofar as these have any important bearing upon religious belief and practice.

Vital movements and key personalities are treated—Abortion and pro-life movements, Neo-Pentecostalism in the Roman Catholic Church, amnesty, economic imperialism, world hunger, the new Liturgy and the old Liturgy, Women in Christian tradition, Zen Buddhism, prolongation of life, new marriage laws. Important persons such as Karl Barth, Francis Dvornik, Josef Jungmann, Frank Sheed, Maisie Ward, Karl and Hugo Rahner, Hans Küng, Paul Tillich, and many others are included.

Readership to which EDR is addressed—The EDR is planned to be useful not only to those with a professional or semiprofessional interest in religion but to the lay person as well. The EDR gives these readers in concise handy form as much information as possible within its scope. It attempts to do in the field of religion what *Columbia Encyclopedia* has done in the sphere of general knowledge. In content and coverage its nearest analogues in the religious field are Cross's *Oxford Dictionary of the Christian Church* in English and the *Dizionario Ecclesiastico* in Italian, but it is a larger and more comprehensive work than the ODCC. It is shorter and more compact than the DE.

Like *Columbia*, it does not undertake to instruct the specialist in his specialty, but it will offer useful summaries of essential information, together with helpful indications of where more complete information can be found. EDR hopes to be valuable to those who want the gist of essential information without having to gather it themselves from books or long articles.

Because the editors, Reverend Paul Kevin Meagher, O.P., Thomas C. O'Brien and Sister Consuelo Maria Aherne, S.S.J. have studiously avoided a polemical stance on controversial issues, the *Dictionary* is also an authoritative reference for libraries, schools, churches and other organizations, regardless of religious affiliation.

Save $10 on Pre-Publication Price—The Encyclopedic Dictionary of Religion will soon be offered for public sale at $99.50 for the standard 3-volume set. The Deluxe edition at $115.00 features a beautiful simulated Moroccan leather binding with padded cover. Its pages are lavishly gilded on the upper edge and side.

NORTHRIDGE, CA 91324

Cloke, Richard
Mister Pistol-John. 1976 166p. Kent Publications, Kent School, 18301 Halsted St., Northridge, CA 91324, paper, $1.95 (0-917458-01-X). Pub. date, October.

Not for youngsters, or for those who take their western fiction seriously, here is a spoof-and-a-half of old formula plots and characters. The writing is at times a bit uneven, but characterizations are well drawn in an entertaining tale peopled by a group that rightly belongs somewhere between Deadwood City and a Woody Allen movie.

BOOKLIST: Dec. 1, 1976

Demystifying the celebrity scientists.

People like Margaret Mead, Paul Ehrlich, Linus Pauling, B.F. Skinner, Carl Sagan, Barry Commoner, and William Shockley, says Rae Goodell, are members of a potent group of scientific gadflies and gladiators who exist in fascinating symbiosis with the media. Their powerful influence over public opinion and policy-making is the subject of Ms. Goodell's provocative book.

HIGHLY RECOMMENDED

MATH WITHOUT TEARS
By Roy Hartkopf

"The author should be commended for the ease with which he handles complicated mathematical concepts. His anecdotal approach in which he indicates through a plain story the nature of a given concept, can be emulated by many mathematics teachers. His skeptical attitude toward some of the sacred cows of mathematics is very refreshing and, in some cases, amusing. He covers the field from the basic concepts of arithmetic through logarithms, momography, graphs, trigonometry, series, and calculus. This is a broad spectrum of subject matter to cover one book; but by sticking to basic ideas and not getting involved in detailed calculation, Hartkopf succeeds admirably. Although the book is aimed at adults not specifically trained in mathematics, bright high school youngsters can read it with pleasure and profit. 151 line drawings. Highly Recommended."—*Library Journal*

Journey of Insight Meditation

A Personal Experience of the Buddha's Way
ERIC LERNER

"Not only gives a fine introduction to Vipassana but sets a standard of excellence for spiritual journals of its kind. It is so good because Lerner is highly aware of the difference between his experiences, and his interpretations of them. . . . His book is readable, thought-provoking, and very real. Strongly recommended."

Wilson Library Bulletin

index to handicrafts, fifth supplement

The **Index to Handicrafts** series covers miscellaneous and previously uncollected material on handicrafts and amâteur workshop projects. The original Index and four successive Supplements cover from roughly 1900 to 1967. The new **Fifth Supplement,** by Pearl Turner, covers 1968-1973 and includes not only American, but also British titles commonly found in public libraries. Over 1,000 book titles and 15 periodicals not indexed by the **Readers' Guide to Periodical Literature** are included, as well as a separate bibliography listing all books now still-in-print from the titles indexed in the previous Index and Supplements. For a complete description of the Handicrafts series, request a copy of Faxon's Publications Catalog.

Borrowed Plumes

BY

Roseleen Milne

"An entertaining tale that blends humor with the sighs and passions of a tempestuous love affair....Milne knows her period, her dialogue is sharp and sprightly, and the plot is quite lively."

The Sounds of Silence

By JUDITH RICHARDS

Returning to Alabama after many years abroad, heiress Aramenta Lee discovers that the "ghost" haunting the family mansion is the son she thought had died at birth. Only through Virgil, a deaf-mute writer, can she reach—and possibly save—this tormented man. "A suspense Gothic in the old sense, as Poe wrote it. The sympathetic portrayal of Virgil's world is educational as well as entertaining." —*Library Journal.* "A moving, fast-paced novel."—*The Booklist.*

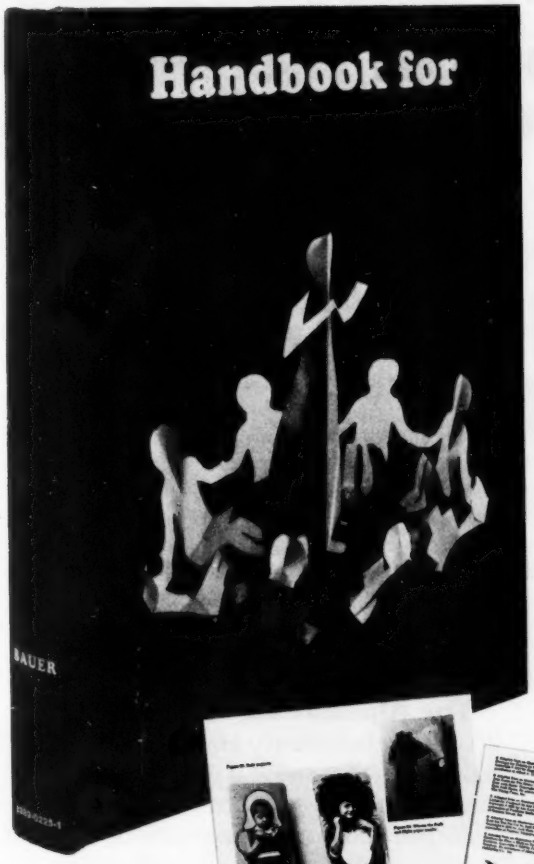
The compleat guide to successful storytelling

Handbook for Storytellers

CAROLINE FELLER BAUER



Everyone likes to listen to a good story, well told. But to Dr. Caroline Bauer—whose storytelling credentials include stints in public and school libraries and her own radio and television programs—the "medium" is just as important as the message.

A really different how-to book, *Handbook for Storytellers* shows parents, teachers, librarians and volunteers how to use effectively a variety of media—including film, music, crafts, puppetry and even magic—to bring stories alive for audiences ranging from preschoolers to senior citizens. The storyteller is taught how to create these media where possible and in all cases how to relate them to various stories.

Handbook for Storytellers is the complete guide to successful storytelling, from planning a single special storytime to a series of storytime programs. No other single book contains such a wealth of information and guidance for both the amateur and professional practitioner.

A variety of subject bibliographies are included to help select appropriate stories to tell on any and every occasion, as well as several sample programs to provide novice storytellers with inspiration and direction.

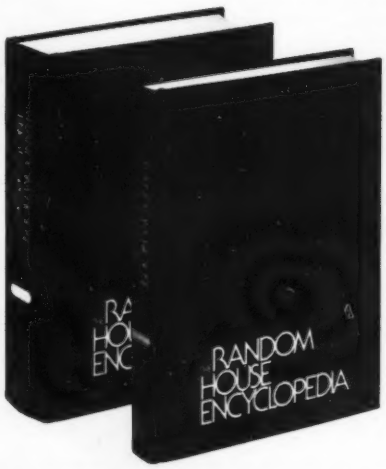
Presenting the Random House Encyclopedia... Two volumes of facts with exciting visual impact.

There's an exciting new fast reference source available from Encyclopaedia Britannica Educational Corporation.

Taking full advantage of modern graphic techniques, the Random House Encyclopedia uses more than 13,800 pictures—11,000 in full color—as a basic vehicle for learning. Coupled with more than 2,750,000 words, the result is a practical, informative and colorful two-volume reference set that any student will find pleasure in using.

The Colorpedia Volume presents a thematically organized exploration of human knowledge in 896 lavishly illustrated full-color spreads, each with 1400 words of text—well over 1,000,000 words in total. Related Colorpedia topics are cross-referenced for in-depth topical surveys.

The Alphapedia Volume contains 25,000 alphabetically arranged entries in its 822 pages to provide a wealth of ready facts, biographies and statistics—plus an 80-page Atlas, and 23 double-page charts; 1,500,000 words in all. And many Alphapedia entries are cross-referenced to related Colorpedia essays for general background and further research.



You owe it to yourself to examine what could well become one of the most often used resources in your reference library—the new Random House Encyclopedia.

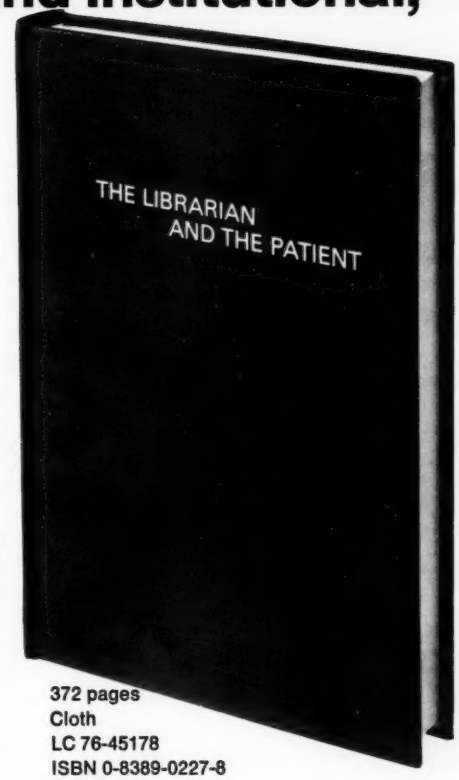
Developing an understanding of the value of the library, both public and institutional, in the health care setting

The Librarian and the Patient

Eleanor Phinney, editor



This is the first comprehensive work on the planning of library services to patients in all health care institutions. *The Librarian and the Patient* integrates and expands the principles and standards that have been adopted to make the patients' library useful in medical and rehabilitative care. It concerns itself with many types and sizes of institutional settings and with patients receiving temporary or permanent care. Institutions for the mentally retarded and physically handicapped as well as those for the ill and injured are included. Information throughout the text is presented not as fixed procedures but as a basis on which each institution and its library may plan or develop services to fit its own situation and needs. Because of this emphasis upon principles, public libraries and state agencies as well as personnel responsible for patients' libraries will identify important extensions of their own functions.

A useful feature is the fully annotated bibliography for each chapter, intended to give the reader an opportunity to explore more deeply the problems examined in that chapter. Other features are the appendix material which samples the variety of public library services to health care institutions, and the diagrams and floor plans drawn with reference to patient needs.

Facts On File® has a present for you on our 37th birthday.

When London was burning, the first issues of Facts On File® appeared in the fall of 1940. France had fallen. Americans were deciding whether to break with tradition and elect Roosevelt for a third term. The movie "Of Mice and Men" was banned from an Army post because chaplains had found it "morbid and degenerate." And a young brigadier-general named Patton led 10,000 men and 400 tanks 90 miles across Alabama—the first cross-country test of a full armored division in the Western Hemisphere.

Since 1940, Facts On File® has provided subscribers with more than 1,900 weekly digests of national and international news. Much has changed in America and the world since then... as well as at Facts On File®. Our list of subscribers includes some 7,500 schools, libraries, newspapers, and government and private institutions. But some important things have stayed the same: our accuracy, objectivity, and reliability.

To celebrate our 37th birthday, we'd like to send you a newly reprinted collection of nine issues and index that Facts On File® published in the latter part of 1940. This book—a collector's item—will be priced at $4.95. But you may have it free merely by filling out the coupon below and mailing it to Facts On File®. This is our way of introducing you to the most distinguished weekly news reference service in the world. Or, if you already are a subscriber, it's our way to thank you.

Requests will be honored as long as supply lasts.
